

SysteCom is now partner with OTE for Business Cloud Services

Systecom aims to provide customers with innovative and reliable solutions. Based on this core value we established our strategic partnership for Business Cloud Services with OTE, the largest telecommunications provider in the Greek market, and, together with its subsidiaries, one of the leading telecom groups in Southeastern Europe.

OTE Business Cloud is a set of services which minimize the traditionally high costs of acquiring and maintaining hardware infrastructure and software installations and licenses, while on the same time ensuring high levels of service quality (SLA) and guarantying the usually expensive high availability. The services are available through a 'pay-as-a-service' model, which does not require any purchase or installation of equipment. The cost of each service is calculated based on the use and is paid monthly through the well-known OTE Bill platform.
